

*HUB DE INOVAÇÃO
PEDAGÓGICA*

Consolidating successful experiences and looking to the future of innovative teaching at FGV

About the Hub

The Hub for Pedagogical Innovation of Fundação Getulio Vargas (HIP FGV) is a forum constituted by the coordinators of the teaching areas of FGV schools, centers and administrative units.

Currently, the Hub has around 30 Members, from more than 15 FGV branches, located in São Paulo, Rio de Janeiro and Brasília.

The main objective of the Hub is to encourage spaces for **pedagogical exchanges between innovative initiatives and good practices from all FGV**, in order to recognize and incite successful pedagogical practices that have the potential to be replicated at FGV.

The Hub's proposal is to **coordinate, encourage and lead** FGV's internal debate for the **improvement of teaching methodologies**, as well as **to create knowledge on the subject of teaching, learning and the use of technologies applied to teaching.**

Purposes of the FGV Hub for Pedagogical Innovation

HIP FGV as a permanent body

The Hub for Pedagogical Innovation is a permanent body of FGV, destined to coordinate, propose and lead FGV's internal debate for the improvement of teaching methodologies in FGV, in addition to creating administrative and academic knowledge on the subject of teaching, learning and the use of technologies applied to teaching.

Purposes:

- ✓ To develop internal research;
- ✓ To develop research related to active methodologies and use of technological resources;
- ✓ To elaborate materials for the teaching and learning community;
- ✓ To conduct training and teaching courses, hold events and other activities, according to demand and debates of the group members, always taking into account the social and economic needs of the moment; and
- ✓ To design and implement an incentive policy for participation in teaching training within the scope of FGV.
